PARAMETRIX

Generative AI & Agentic Systems

EMPLOYEE POLICY HANDBOOK

Version 1.0 | Effective Date: 1 July 2026

Classification: Internal — All Employees

People & Culture Team, Parametrix Technologies Pvt. Ltd.

Table of Contents

1. Introduction & Purpose....3
2. Code of Conduct....4
3. Notice Period Policy....6
4. Key Results, Goals & Performance Framework....7
5. Salary Structure & Compensation....9
6. Leave Policy....11
7. Acknowledgement....13

1. Introduction & Purpose

Welcome to Parametrix. This handbook sets out the policies, standards, and benefits that govern employment at Parametrix Technologies Pvt. Ltd. (“Parametrix,” “the Company,” “we,” or “us”).

Parametrix builds Generative AI and Agentic Service products — from autonomous agent platforms to applied LLM solutions for enterprise customers. Our work moves fast, demands rigor, and carries real responsibility, since the systems we ship can act on behalf of our customers' businesses. This handbook reflects that reality: it is designed to keep our teams aligned, accountable, and supported as we scale.

This document applies to all full-time employees of Parametrix, across all locations and functions, unless a specific policy states otherwise. It does not constitute a contract of employment. Where a signed offer letter or employment agreement conflicts with this handbook, the signed agreement prevails.

1.1 Our Operating Principles

- **Build responsibly.** We ship agentic systems that act autonomously; we hold ourselves to a higher bar on testing, oversight, and safety than traditional software.
- **Move with ownership.** Every employee is empowered to make decisions within their domain and is accountable for the outcomes.
- **Default to transparency.** Information is shared openly across teams unless there is a specific confidentiality or security reason not to.
- **Compound learning.** The field moves quickly; we are expected to learn continuously and share knowledge generously.

1.2 Policy Review

This handbook is reviewed by the People & Culture team at least once every twelve months, or sooner if regulatory or business needs require. Material changes will be communicated to all employees at least 14 days before taking effect, except where changes are required immediately by law.

2. Code of Conduct

The Code of Conduct defines the minimum standard of behaviour expected from every Parametrix employee, contractor, and intern, regardless of seniority or function.

2.1 General Standards

- **Integrity first.** Employees must act honestly in all dealings with colleagues, customers, vendors, and the public. Misrepresentation of model capabilities, benchmarks, or product performance to customers or within the Company is strictly prohibited.
- **Respect and inclusion.** Parametrix maintains a zero-tolerance policy toward harassment, discrimination, bullying, or retaliation of any kind, based on gender, religion, caste, disability, sexual orientation, age, or any other protected characteristic.
- **Professional conduct.** Employees are expected to conduct themselves professionally in all Company-related settings, including remote work, client calls, conferences, and online communication on Company channels.
- **Conflict of interest.** Employees must disclose any outside engagement, advisory role, investment, or relationship that could reasonably conflict with Parametrix's interests, including freelance AI/ML work for competing entities.
- **Anti-bribery and gifts.** Employees must not offer, accept, or solicit bribes, kickbacks, or gifts beyond nominal value (₹5,000) from vendors, customers, or partners.

2.2 Responsible AI & Data Conduct

Given the nature of our products, the following standards apply specifically to engineering, research, and product roles, and to anyone handling model training data, prompts, or agentic outputs.

- **No unauthorised production deployment.** Agentic workflows or model updates that take autonomous actions (e.g., financial transactions, code deployment, outbound communication) on behalf of a customer must pass through the defined review and staging gates before going live.
- **Data handling.** Customer data, prompts, and fine-tuning datasets must never be used to train or evaluate models outside the scope explicitly agreed with the customer, and must never be copied to personal devices or third-party tools without authorisation.
- **Model honesty.** Internal and external claims about model accuracy, hallucination rates, or autonomy levels must be backed by documented evaluation results. Cherry-picked demos presented as general capability are a conduct violation.
- **Incident escalation.** Any employee who observes an agent or model behaving unsafely, leaking data, or acting outside its intended scope must escalate immediately to their lead and the Safety/Security channel, regardless of whether they caused the issue.
- **IP and licensing.** Use of open-source models, datasets, or third-party APIs must comply with their licences. Employees must not introduce code, weights, or data of unclear provenance into Company products.

2.3 Confidentiality

All proprietary information — including model architectures, prompts, system designs, customer data, pricing, and unreleased roadmaps — is confidential. This obligation survives termination of employment and is reinforced by the confidentiality clause in each employee's offer letter.

2.4 Use of Company & AI Tools

- **Internal tools.** Company laptops, cloud accounts, and software licences are provided for work purposes. Reasonable personal use is permitted provided it does not violate security policy or law.
- **Third-party AI tools.** Employees may use approved third-party AI coding/writing assistants for productivity, but must never paste confidential customer data, credentials, or unreleased model weights into external tools that are not on the Company's approved vendor list.

2.5 Disciplinary Process

Violations of this Code of Conduct are addressed proportionately, ranging from a verbal warning to immediate termination, depending on severity. Safety-related violations (e.g., unauthorised production deployment of an unreviewed agent, or data exfiltration) are treated as serious misconduct and may result in immediate termination, regardless of prior record.

3. Notice Period Policy

This policy governs the notice required for voluntary resignation and for termination initiated by the Company, ensuring continuity of work — particularly for in-flight customer deployments and agentic systems in production.

3.1 Standard Notice Periods

Role Band	Notice by Employee	Notice by Company
Intern / Trainee	15 days	15 days
Associate / Individual Contributor (L1–L3)	30 days	30 days
Senior IC / Team Lead (L4–L5)	45 days	45 days
Manager and above (L6+)	60 days	60 days
Employees on Probation	7 days	7 days

3.2 Resignation Process

1. Submit a written resignation to your reporting manager and People & Culture (people@parametrix.ai) via the HRMS portal.
2. Manager and the employee agree on a knowledge-transfer (KT) plan covering active sprints, customer-facing agentic deployments, and on-call responsibilities.
3. Complete the exit checklist, including return of Company assets, revocation of production and cloud access, and handover of credentials.
4. Final clearance and full-and-final settlement are processed within 30 days of the last working day.

3.3 Buyout of Notice Period

An employee may request to buy out the unserved notice period, subject to manager and People & Culture approval. The buyout amount is calculated as: (Unserved Notice Days ÷ 30) × Monthly Gross Salary. Buyouts are not guaranteed and depend on handover readiness, particularly for roles holding production access to customer agentic systems.

3.4 Termination by the Company

- **With notice or pay in lieu.** For performance-related separations not involving misconduct, the Company will provide notice as per the table above or equivalent pay in lieu.
- **Without notice.** In cases of proven gross misconduct, fraud, data breach, or violation of the Responsible AI clauses in the Code of Conduct (Section 2.2), the Company reserves the right to terminate employment immediately without notice or pay in lieu, subject to a fair internal inquiry.
- **Garden leave.** The Company may place an employee on garden leave for all or part of the notice period, during which the employee remains on payroll but is relieved of duties and access to production systems.

4. Key Results, Goals & Performance Framework

Parametrix uses an Objectives and Key Results (OKR) framework, supplemented by role-specific Key Result Areas (KRAs), to align individual contribution with company strategy. Given the pace of change in AI products, OKRs are set and reviewed quarterly rather than annually.

4.1 OKR Cadence

5. Company-level OKRs are set by the leadership team at the start of each quarter and shared company-wide within the first week.
6. Team-level OKRs cascade from company OKRs within the second week, owned jointly by the function lead and the team.
7. Individual KRAs/goals are agreed between employee and manager within the third week, using the company OKRs as context.
8. Mid-quarter check-ins (Week 6) track progress and allow OKRs to be re-scoped if priorities shift — common in a fast-moving AI roadmap.
9. End-of-quarter review scores each Key Result on a 0.0–1.0 confidence scale; this feeds into, but does not solely determine, performance ratings.

4.2 Illustrative Role-Based KRAs

The table below is illustrative; each role has a detailed KRA document maintained by the function lead and People & Culture.

Role	Primary KRA	Sample Key Results / Metrics
AI/ML Engineer	Model & pipeline delivery	Models shipped to production on schedule; eval benchmark pass rate; latency/cost efficiency of inference
Agentic Systems Engineer	Agent reliability & autonomy	Task completion rate of deployed agents; rate of human-escalation vs. autonomous resolution; incident-free uptime
Product Manager	Product-market outcomes	Feature adoption rate; customer-reported CSAT/NPS; roadmap milestones delivered on time
Solutions / Customer Success	Customer outcomes	Time-to-value for new deployments; renewal rate; escalation resolution time
Sales / BD	Revenue growth	New ARR booked; pipeline-to-close conversion; average deal cycle time
People & Culture / Ops	Organisational health	Time-to-hire; employee engagement score; policy-compliance audit pass rate

4.3 Performance Ratings & Review Cycle

- **Quarterly pulse review.** A lightweight manager-employee conversation on OKR progress; informal, no formal rating.

- **Half-yearly performance review.** Formal review combining OKR achievement, peer feedback (360° for L4+), and Code of Conduct adherence; results in a rating of Exceptional / Strong / Meets Expectations / Needs Improvement.
- **Annual compensation review.** Conducted once a year, informed by the two half-yearly review outcomes, team budget, and market benchmarking.

Ratings of “Needs Improvement” in two consecutive half-yearly cycles trigger a formal Performance Improvement Plan (PIP) of 30–60 days with clearly defined, measurable exit criteria.

5. Salary Structure & Compensation

Parametrix follows a transparent Cost-to-Company (CTC) structure designed to balance take-home pay, tax efficiency, and long-term wealth creation through equity, reflecting the long-horizon nature of building AI products and IP.

5.1 CTC Components

Component	Typical % of CTC	Notes
Basic Salary	40% of CTC	Fixed monthly base component
House Rent Allowance (HRA)	20% of CTC	Tax-exempt subject to rent receipts, as per statute
Special / Flexible Allowance	15% of CTC	Flexible pay-out, adjusted to balance statutory components
Performance Bonus (Variable)	10–15% of CTC	Linked to quarterly/half-yearly KRA & OKR achievement (Section 4)
Retirals – Provident Fund (Employer)	~6% of CTC	Statutory employer PF contribution
Retirals – Gratuity	~5% of CTC	Statutory, payable on separation after 5 years of continuous service
ESOP / RSU Pool (where applicable)	Role-dependent	Granted separately from CTC for L4+ and select critical roles, vesting over 4 years with a 1-year cliff

5.2 Variable Pay & Bonus Payout

- **Pay-out frequency.** Variable pay tied to half-yearly performance ratings (Section 4.3) is paid out within 30 days of rating finalisation.
- **Multiplier.** Exceptional = 1.5×, Strong = 1.1×, Meets Expectations = 1.0×, Needs Improvement = 0–0.5× of the target variable pay.
- **Spot bonuses.** Managers may nominate spot bonuses (up to ₹25,000) for exceptional contribution outside the formal cycle, e.g., resolving a critical production agent incident.

5.3 ESOPs

Employees granted equity under the Parametrix Employee Stock Option Plan vest over 4 years with a 1-year cliff (25% vests after year one, remainder monthly/quarterly thereafter). Exercise windows and vesting details are governed by the separate ESOP grant letter and plan document, which prevails over this section in case of conflict.

5.4 Pay Cycle & Statutory Deductions

- **Pay date.** Salaries are credited on the last working day of each month.
- **Statutory deductions.** Income tax (TDS), Provident Fund, and Professional Tax (where applicable) are deducted as per prevailing law.

- **Payslips.** Digital payslips are issued via the HRMS portal by the 1st of the following month.

5.5 Salary Revisions

Salary revisions are evaluated annually, aligned with the Annual Compensation Review (Section 4.3), and are based on performance rating, internal pay-band benchmarking, and market data for AI/ML talent, which Parametrix reviews twice yearly given how rapidly compensation benchmarks move in this industry.

6. Leave Policy

Parametrix's leave year runs from 1 January to 31 December. All leave is applied for and approved through the HRMS portal except in emergencies, where verbal/written intimation to the manager is acceptable, followed by retrospective HRMS entry within 3 working days.

6.1 Leave Entitlements

Leave Type	Entitlement	Key Conditions
Earned / Annual Leave (EL)	18 days/year	Accrued at 1.5 days/month; max carry-forward 30 days; encashable on exit
Sick Leave (SL)	10 days/year	Non-encashable; medical certificate required beyond 2 consecutive days
Casual Leave (CL)	6 days/year	For short, unplanned personal needs; max 2 consecutive days without manager approval
Maternity Leave	26 weeks	As per the Maternity Benefit Act; full pay
Paternity Leave	2 weeks (10 working days)	To be availed within 3 months of childbirth/adoption
Bereavement Leave	5 days	Immediate family; full pay, no documentation delay required
Marriage Leave	5 days (one-time)	For the employee's own wedding
Wellness / Mental Health Leave	4 days/year	Self-certified, no questions asked; part of our wellbeing commitment
Sabbatical (after 3 years)	Up to 4 weeks unpaid	Subject to manager and People & Culture approval

6.2 Public Holidays

Parametrix observes 10 fixed public holidays each year, announced via the HR calendar in January, plus 2 floater holidays employees may use flexibly for regional/festival observances of their choice.

6.3 Work-from-Anywhere & Remote Flexibility

Given the nature of our work, employees may work remotely up to 2 days a week by default, and fully remotely with manager approval, provided production on-call and customer-facing commitments are met. This is a flexibility benefit, not a leave category, and does not need to be logged as leave.

6.4 On-Call & Agent-Incident Coverage

Engineering and Solutions employees on the production on-call rota for live agentic deployments must ensure adequate handover before taking leave during their on-call window. Leave requests coinciding with on-call duty require swap arrangement confirmed in the on-call tool prior to approval.

6.5 Unpaid Leave

Employees who exhaust paid leave balances may apply for unpaid leave of up to 10 working days per year, subject to manager and People & Culture approval, business need, and a satisfactory performance record.

6.6 Leave Encashment & Lapsation

- **Earned Leave:** Up to 30 days may be carried forward; balances beyond this lapse on 31 December unless local law requires otherwise.
- **Sick & Casual Leave:** Do not carry forward and lapse at year-end; not encashable at any time.
- **On separation:** Unused Earned Leave (up to the carry-forward cap) is encashed in the final settlement at the last drawn basic salary.

7. Acknowledgement

This handbook is a living document and will evolve as Parametrix grows. Questions on any policy should be directed to people@parametrix.ai. Employees are required to read this handbook in full and acknowledge receipt through the HRMS portal within 7 days of joining or of any major revision.
